DORSET FLORA RECORDING CARD

Site or Location	Recorder(s)
Habitat	
Grid Reference	Date

The list overleaf shows commonly recorded species in Dorset. Species which are nationally or locally rare, scarce or threatened may not be included and for these species we would like more detail, including abundance. Please record in the table below. Most **Dorset Notable** species are included and marked *. Dorset Notable species have been chosen to assist in the selection of Sites of Nature Conservation Interest and they are habitat specific. The full list of Dorset Notable Species and their habitats can be found on the DERC website in the Resources Library. Name changes for common species can also be found here.

Rare, notable & other species not included overleaf

CONSENT TO RELEASE OF RECORDS

Records are sent to DERC on the understanding that the information provided by the recorder/compiler/determiner will be entered onto a computerised database which will be used for nature conservation, research and education and will be available for public information although records for particular sites or species may be restricted. The information remains the intellectual property of the recorder/compiler/determiner at all times.

Please add your data to Living Record www.livingrecord.net or return your form to
DERC, Dorset History Centre, Bridport Road, Dorchester, DT1 1RP
